

WELLINGTON

URBAN DISTRICT COUNCIL

(SOMERSET)

ANNUAL REPORT

- 1916 -

1916-17

1916-17

WELLINGTON URBAN DISTRICT COUNCIL
(COUNCIL)

Mr. Chairman, Ladies & Gentlemen,

I have the honour to present a Report for 1972. This is largely the work of Mr. Clarkson, your Public Health Inspector, who deals in detail with the sanitary circumstances of the Urban District in the past year.

So far as the General Provisions for Health Services in the District are concerned these have not varied to any substantial extent from those described in my Report for 1971. The Health Centre referred to in that Report has now been completed and brought into operation, and is proving an asset to the town.

Vital Statistics for Births and Deaths, and an account of the various Causes of Death are not yet to hand from the Registrar General, and since the Wellington U.D.C. forms part of a combined registration district, it has not proved possible to disentangle these statistics locally.

There was a sharp outbreak of measles in the early part of the year producing a total of ninety-seven cases. Eight cases of all-viral infection were traced to infected milk, and further cases were prevented by appropriate action to deal with the source. Six cases of Infective Mononucleosis were notified, and one case each of Pulmonary Tuberculosis and Rheumatism.

I am

Yours obedient servant

John T. Clark

Offices, Shops & Railway Premises Act 1963	32
Prevention of Damage by Pests Act 1949	1
Petroleum (Consolidation) Act 1923	19
Rivers Pollution Prevention Acts	1
	138

WATER SUPPLY

The district water supply is under the supervision of the West Somerset Water Board, and is supplied into the town's mains from two separate directions so that approximately half the premises are fed from Clatworthy Reservoir. This is a soft upland surface supply and it gives no cause for complaint. The remaining half of the town draws water from Fulwood, Westford and Poynton springs and the Pitt Farm borehole. This is a hard water and much of it has an iron content near the permissible maximum. Complaints have continued to be received regarding the water having a quantity from the Pitt Farm borehole. Samples of water from this source usually show an iron content on the maximum permissible level, or slightly in excess. The Water Board accept that this supply is not entirely satisfactory and as soon^{as} circumstances permit it will be withdrawn, but this is obviously long term planning.

The tables below show that all houses except two now have a piped supply of district water, and negotiations are proceeding with a view to further improvement of this position.

Details of the water supply and samples examined are set out below :-

	No. of houses	Population
District water supply	3,408	9,542
Well water supply	2	8
	3,410	9,550

Water Samples :-

	Bacteriological examination	Chemical analysis	Special check on metal content
District water supply	26 satisfactory	7 satisfactory	23
Well water supply	2 unsatisfactory	1 satisfactory	-

SEWAGE DISPOSAL AND DRAINAGE

The 1972 Report referred to the major works in hand for the improvement of the Sewage Works and the Sewerage of the area. These works are proceeding as planned and it is probable that Phase II - (re-construction and enlargement of the Tone Sewage Works and the abolition of the Mitchells Pool Works) will be completed early in 1974.

Tenders are in hand for Phase III - additional Sewerage Works.

Samples of sewage and trade effluents have been submitted for examination as follows :-

Tone Works - 51 samples.

Mitchells Pool Works - 12 samples.

Trade Effluent - 12 samples of trade effluent and 12 creek samples from Tone Sewage Works examined for pesticides - all satisfactory.

The 1972 Report referred to premises not drained to the sewers. The position is much the same except for the following progress -

- (a) Tone Wharf - Orders have been given for a scheme to pump the sewage from these 7 houses to the main sewer. It is probable that this work will be completed in 1974.

- (b) Ditchford, Rockwell Green - The owners have now agreed a scheme to drain these houses to the main sewer and the work should be completed in 1974.

PUBLIC CLEANSING

The comments made in the 1972 and 1973 reports on refuse collection still apply. This is a service which should be improved and more attention paid to the reclamation of waste materials for re-cycling to industry.

Controlled tipping has proceeded at the Poole Brickworks, where work is proceeding to provide a pulveriser. This pulveriser should be in operation early in 1974.

VERMIN AND INSECTS

There have been no problems under this heading and the odd cases arising have been effectively dealt with by the Council's Contractor.

OFFENSIVE TRADES

There are no offensive trade premises in the district.

COMMON LODGING HOUSES

There are no premises in the area used or registered as Common Lodging Houses.

CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT 1960

Two sites continue to be used for caravans :-

(a) Cadeside (adjoining A73) - Controlled by the Caravan Club - with accommodation for 60 touring caravans. This is well controlled and has caused no problems. It is largely used as a transit site.

(b) Pitt Farm Caravan Site (fronting A73) - This site is now licensed for 60 residential caravans. Many of the vans have been on the site for long periods and are regarded as permanent homes by their owner/occupiers. A few itinerants use the site, but usually stay for periods of several months.

There is one case of overcrowding - in a problem family - which is proving difficult to abate.

Generally, whilst the site is well managed and the site owner co-operates with the department, there is a need for firm supervision.

One site licence for an individual caravan expires on 30th June 1971.

SWIMMING POOLS AND BATHS

There are now five swimming pools in the area -

- (a) One privately owned and operated by a Swimming Club.
- (b) Two pools at schools and supervised by the County Health Inspector on behalf of the Education Authority.
- (c) One pool at a public school and supervised by the School Governors.
- (d) One pool at the local authority Sports Centre opened on September 1971.

The private pool operated by a Swimming Club is an 'open air pool' with seasonal use, and a capacity of 65,625 gallons. Mains water is used and this is mechanically filtered and chlorinated. Unfortunately difficulties again arose in mid-season with the drip feed for chlorinating this water, which took some weeks to correct. This resulted in some low residual chlorine readings. Samples are taken and tests carried out on a weekly routine during the open season and details of these can be seen in the table below.

The supervision of the new pool at the Council's Sports Centre is by the staff making and recording two hourly tests for residual chloring and pH value and for this department to submit two samples per month to the Public Health Laboratory.

Bacteriological samples

Private swimming pool - 28 satisfactory
 2 with B'coli of 1 per 100 m.litre,
 one of which also had E/coli of 1
 per 100 m/l.

Sports Centre Pool - 6 satisfactory

Private Swimming Pool

32 tests for residual chlorine -	2 readings -	Nil
	3 "	- Trace
	2 "	- 0.25
	2 "	- 0.5
	3 "	- 2.0
	3 "	- 2.0

30 tests for pH value - all showing readings of 8.0,

OFFICES, SHOPS & RAILWAY PREMISES ACT 1962.

During the year there were 28 new registrations of premises, making a total of 101 premises registered under this Act on 31st December, 1972, employing 447 persons (182 males and 264 females). A summary of these premises is set out below :-

Offices	31
Retail Shops	57
Wholesale Shops & Warehouses	5
Catering Establishments	7
Fuel storage depots	1
	101

A total of 116 inspections have been made during the year for special enquiries in respect of the Act and Regulations, and 5 general inspections were also made. There were also 125 inspections of registered premises, for other purposes, when an opportunity was taken to make a general note regarding observance of Regulations affecting the above Act.

Arising from these visits 31 letters were sent to premises regarding non-registration and attention was drawn to 3 cases of inadequate first aid boxes, one case of failure to provide a thermometer, one case of inadequate heating of a retail shop and a case of failure to display an Abstract of the Act.

Two cases of non-fatal accidents were reported - one arising from a fall on a staircase and one on a shop floor. No action was necessary in these cases. No notifications were received under the requirements of the Offices, Shops and Railway Premises (Hoist & Lifts) Regulations 1963.

Since the introduction of this Act in 1963 the staff of this department has had change and breaks in service. This, with inadequate clerical assistance and the pressure of other duties, has inevitably resulted in insufficient attention and inspection being devoted to this important legislation affecting the welfare of office and shop workers, and the national emergencies during the winters of the last few years has made it difficult to press the provisions of the Act dealing with heating and artificial lighting. From inspections made it is generally felt that the provisions of the Act are reasonably observed and a district of this character does not suffer the cramped and inadequate provision for office and shop work which arises in some of the more densely populated areas. During recent months the register has been revised and most non-registered premises brought into line, in the hope that soon after local government re-organisation in April 1974, the way will be clear for a substantial increase in the number of general inspections.

It has been observed that where new premises are provided the amenities for staff, sanitary accommodation, lighting and heating and available spaces of a much higher standard than that at existing and converted premises. It is, however, unfortunate that proposals for new buildings rarely made adequate provision for the storage of refuse and little thought is given as to how it will be disposed of, until the premises are opened. Much of the refuse arising is trade refuse and few take the trouble to enquire as to its disposal and how frequently it can be collected. Judging by the conditions at the rear of new shops in other towns this appears to be a fairly general problem.

SHOPS ACT 1950

The Council has continued to exercise powers under this Act, delegated by the Somerset County Council.

During the year 137 visits were made to shop premises. No contraventions regarding the Act were noted and no complaints were received. Two enquiries for information regarding closing hours were dealt with. There were no enquiries, nor complaints in respect of the employment of young persons.

From the information obtained on the above mentioned visits and general observations of shops within the area, there appears to be reasonable observance of the provisions of this Act.

FACTORIES ACT 1961

At the end of the year 43 factories were on the register and three sites were in use for Building and Engineering Works - 27 inspections have been made of these premises and sites and three cases of defective sanitary accommodation dealt with.

The statutory statement required by Section 15(1) of the Act is in the annex at the end of this Report.

BAKEHOUSES

There is one general bakehouse in the district and one small bakerhouse with a very limited range of products. These premises have been satisfactorily maintained.

CLEAN AIR ACTS 1956/68

The position is much the same as set out in the 1972 Report. There has been no consideration of Smoke Control Areas and no serious emission of industrial smoke or grit.

NOISE ABATEMENT

The few complaints received have been of a minor character and in each case improvements have been secured by informal action.

MEAT INSPECTION

There is only one slaughterhouse licensed in the district and whilst this is well maintained, it is not well sited and there is no room for desirable improvements. Slaughtering takes place one day per week and it has not been necessary to regulate their hours. There is 100% inspection of all animals slaughtered and the maximum inspection charges are made.

Details of the throughput are as follows :-

	Cattle excluding Cows	Cows	Calves	Sheep and Lamb	Pigs
Number killed	131	-	-	765	-
Number inspected	131	-	-	765	-
<u>All diseases except Tuberculosis and Cysticerci :</u>					
Whole carcasses condemned	-	-	-	-	-
Carcasses of which some part or organ was condemned	5	-	-	15	-
Percentage of the number inspected affected with disease other than tuberculo- sis and cysticerci	3.8	-	-	1.9	-
<u>Tuberculosis only :</u>	-	-	-	-	-
<u>Cysticercosis :</u>					
<u>Weight of meat condemned (in lbs)</u> <u>for :</u>					
(a) Tuberculosis	-	-	-	-	-
(b) Cysticercosis	-	-	-	-	-
(c) Other	101	-	-	19	-

FOOD CONDEMNED (Other than meat at the slaughterhouse)

Cooked meat and meat products	18 lbs.
Canned meat	63 lbs.
Other canned food	69 lbs.
Fruit and vegetables	23 lbs.
Other foods	1 cwt. 8 lbs.
	3 cwt. 74 lbs.

FOOD POISONING OUTBREAKS

One troublesome case of *Salmonella* infection arose, which was eventually traced to an infected herd and the sale of raw milk. This rather large milk supply is now pasturised and will remain so.

FOOD

The supervision of food supplies is a most important part of the duties of this department, particularly as the food distributive trade is far in excess of the needs of the area. Residents of many adjoining districts shop in Wellington for food.

Details of special premises are set out below along with comments on food complaints and action taken. This work resulted in 240 inspections of the various premises.

(a) Milk and Dairies Regulations -

Registered distributors of milk	19
Registered dairy premises (other than farms)	6

(b) Food Hygiene (General) Regulations 1970

Premises complying with Regulation 18	85
Premises complying with Regulation 19	40

(c) Food and Drugs Act 1955

Premises registered - Section 16 - Ice Cream	33
Premises registered - Section 16 - Cooked Meats etc.	7

Some 20 contraventions of the Food Hygiene (General) Regulations 1970 were noted and dealt with by informal action, and the number of complaints of unsatisfactory food was 12 compared with 16 in 1972. All these complaints were carefully investigated and dealt with by warnings where appropriate. No legal proceedings were considered necessary. Brief details of these complaints are set out below :-

- (a) Offensive taste of Danish Pastries - not confirmed.
- (b) Packet of Quick Macaroni - affected with biscuit beetle.
- (c) Tainted milk powder - 20% excess moisture.
- (d) Packet bacon - offensive smell.
- (e) Tin of baked beans - defective tin.
- (f) Loaf of bread - mouse droppings.
- (g) Tin of peas - defective tin.
- (h) Packed butter - slightly rancid.

The investigation of these complaints has been with the fullest possible assistance from the County Analyst's Department and I desire to express my appreciation to Miss Joan D. Peden, County Analyst, and her staff.

POULTRY PROCESSING PREMISES

There are no processing plants within the district boundaries.

TUBERCULOSIS ORDER

No cows were slaughtered under this Order during the year.

HOUSING

Council Houses - Work on the Olands Meadow site was completed. This has provided 58 aged persons bungalows and 17 houses. Of these 8 units were completed in 1972 & 67 in 1973.

The re-roofing of 152 Council houses was completed in 1972/73, but whilst work on schemes for the improvement of other Council houses has been done, the necessary improvements had not been commenced at the end of the year, except for work on 42 general purpose dwellings at Bulford where work is in hand on the provision of central heating and an intercommunication system.

Private Houses - The progress on the re-construction and enlargement of the Sewage Works has enabled the Planning authority and the District Council to release more land for houses. As a result 35 new houses have been built during the year under re-view and there should be further increases in this sector during the next few years.

Houses gained or Lost - During the year two houses were demolished and eight houses closed, making a total of 10 units lost. The closures are of a temporary nature to allow for reconstruction and improvement. Against this 21 units have been gained due to improvements and cancellation of Closing Orders and the conversion of business premises to flats and one large house into three houses.

The overall gain being 11 housing units.

The following table is required by the Department of the Environment

(a) Number of houses which on inspection were considered to be unfit for human habitation.	16
(b) Number of houses, the defects in which were remedied in consequence of informal action by local authority or their officer.	13
(c) Number of Representations made to local authority with a view to :	
(1) Serving of Notices requiring execution of works	-
(2) Making of Demolition or Closing Orders	15
(d) Number of Informal Notices served requiring execution of works.	8
(e) Number of houses which were rendered fit after service of formal notice	-
(f) Number of Demolition or Closing Orders made	7
(g) Number of houses in respect of which an Undertaking was accepted under sub-section (4) of Section 16 of the Housing Act 1957.	-
(h) Number of houses demolished	2

The general comments regarding housing are similar to 1972. There is, however, a general indication that more owners and owner/occupier are accepting the need for improvements and this is being reflected in the increasing interest in applications for Improvement Grants.

The progress in some of the more important cases is set out below :-

Clearance Area No. 1/71

Nos. 12, 13, 14, 15, 16, 17 and 19 Rockwell Green

This is the area not confirmed by the Department of the Environment and referred to in the 1971 report. The Council is still waiting for the improvements promised by the owners. It seems probable that such proposals will be submitted early in 1974.

Nos. 16 - 23, Eight Acre Lane

These are being improved by agreement with the owners. By the end of the year No. 23 had been improved and re-occupied and the occupiers of other houses have been re-housed, and work with the aid of Improvement Grants, is well advanced to convert Nos. 17, 18, 19, 20, 22 and 22 into three cottages.

Nos. 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17 & 18
Improvement Place

Previous reports have dealt with the decision and reasons for such decision, to retain these cottages on the basis of verbal and written undertakings. It is now 2 years since this decision. In some cases the promises so readily made at the meeting ~~and~~ by the various owners have not been carried out and in some respects the position tends to become more complicated. So much so that the making of additional Closing Orders may become necessary.

A summary of the present position is -

Nos. 3,7,8,9,15 - Improved to Standard Grant Conditions.

Nos. 12 and 18 - Improvement works in progress.

No. 13 - Subject to Closing Order.

Nos.4, 5, 6,14,17 - Subject to Undertakings to improve before re-letting.

No. 2 - Extended Standard Grant approved, but now for sale - work not carried out.

No. 10,11 & 16 - No progress and little likely in respect of Nos. 10 and 11.

Nos. 1, 2, 3, 4,5 and 6 Trinity Row

These houses have now been repaired and improved.

Nos. 18 - 51 Acre Cottages

The policy of the Council to endeavour to raise all these Cottages to the Standard laid down for Standard Grants, has almost been accomplished. By the end of the year all cottages except two had been provided with standard amenities. Of the two remaining cottages, action in one case has been deferred due to the age and infirmity of the occupier, and in the other case the owner/occupier is less co-operative than others in this area.

Riverside

The decision to take no further action in respect of the 20 houses in this area provided they are raised to Standard Grant Conditions, is working out very satisfactorily. By the end of the year improvements completed and in hand will leave only 3 houses below this standard and it is hoped to make further progress in the immediate future.

The Well and Rockwell Green Area

The notes regarding this area in the 1972 report still apply. The present position being that the new Taunton Deane District Council will give this area priority attention.

<u>IMPROVEMENT GRANTS</u>	<u>1970</u>	<u>1971</u>	<u>1972</u>	<u>1973</u>
Applications received	14	19	29	25
Applications approved	10	21	20	24
Applications refused	-	1	-	-
Applications withdrawn	-	1	-	-
Applications awaiting decision	4	-	-	1
Value of Grants approve	£8,341	£14,640	£27,281	£20,429

<u>STANDARD GRANTS</u>	<u>1970</u>	<u>1971</u>	<u>1972</u>	<u>1973</u>
Applications received	24	21	24	18
Applications approved	22	19	22	18
Applications refused	1	-	1	-
Applications withdrawn	1	-	-	-
Applications awaiting decision	-	2	-	-
Value of Grants approved	£4,426	£2,867	£4,422	£1,870

There has been a slight reduction in the number of applications for grants - 42 as against 52 in 1972 and the value of grants approved was £24,298, compared with £31,717 in the previous year.

The applications include improvements in 4 cases to convert 2 houses into 1 house, all properties subject to Housing Act procedures, and one application in respect of a house subject to a Closing Order. The Standard Grant applications include 2 Extended Grants and one reduced standard grant (Housing Act 1969 - Section 9 (7)).

There were no applications for Special Grants.

QUALIFICATION CERTIFICATES

Section 44 (2)

No applications were received during 1973.

Section 51(1)

Nine applications were received and nine Qualification Certificates Issued.

RODENT CONTROL

The arrangement to employ a private contractor has continued. Under this contract all Council premises are regularly examined and treated as required, and the arrangement has kept these premises free from serious infestation. The contract also provides for an examination and report twice-yearly on all farm premises and pig kill boilers.

Sewer manholes have been baited as recommended by the appropriate Ministry. The treatment in Spring involved the baiting of 50 manholes. There were two bait takes and these were followed up in the Autumn when 10 sewer manholes were baited. There were no bait takes on this occasion.

The number of complaints received totalled 10, all of which were investigated. These were all confirmed as minor infestations and appropriate action taken. There has been no evidence of Warfarin resistance.

DISEASES OF ANIMALS (WASTE FOOD) ORDER 1957

In April 1958 the Council accepted delegated powers from the Somerset County Council and at the commencement of the year the only licenced premises in use were those of Mr. W.A.J. Lang at Linden, Upper Westford. Arising from inspections made regarding the new Code of Practice proposed by the Somerset County Council and the introduction of the Movement of Pig (Waste Food Precautions) Order 1971, Mr. Lang decided to discontinue the collection and boiling of kitchen waste and to find an alternative feeding stuff for his pigs. This remaining licence was cancelled in May 1972, so that at present there are no licenced premises in this area.

Inspection of Piggeries revealed two unlicenced premises dealing, in small amounts, with the collection and boiling of Kitchen waste. Both premises were unsuitable for registration and the methods of sterilizing the Kitchen Waste were unreliable. After suitable warnings the collection and feeding of Kitchen waste was discontinued.

During the year 23 inspections have been made in connection with this Order.

ANNEX

FACTORIES ACT 1961

1. INSPECTIONS for the purposes of provisions as to health :-

	Number on Register	NUMBER OF		
		Inspections	Written Notices	Proce- cutions
(i) Factories in which Sections 1,2,3,4 & 6 are to be enforced by Local Authorities.	-	-	-	-
(ii) Factories not included in (i) in which Section 7 is enforced by Local Authority.	46	74	2	-
(iii) Other premises in which Section 7 is enforced by the Local Authority (excluding out-workers' premises)	-	-	-	-
TOTAL	46	74	2	-

2. Cases in which DEFECTS were found :-

Particulars	Number of cases in which defects were found				Number of cases in which prosecutions were instituted
	Found	Remedied	Referred		
			to H.M. Inspector	by H.M. Inspector	
Want of Cleanliness Section 1.	-	-	-	-	-
Overcrowding Section 2.	-	-	-	-	-
Unreasonable Temperature Section 3.	-	-	-	-	-
